

AI Opportunity Map

SECTION 1: Data Foundations

How structured and connected is your production data?

Score each item from 1 (low) to 5 (high).

STATEMENT

SCORE (1-5)

Our job/order data is fully digital and consistently entered

We can access live data across production, inventory, and shipping

Key metrics (waste, delays, setup time) are tracked and visible

Tip: If your team still relies on clipboards or exports to run jobs, start here.

SECTION 2: Operational Pain Points

Where do you lose the most time, money, or quality?

Score each item from 1 (low) to 5 (high).

STATEMENT

SCORE (1-5)

Operators spend time on repetitive logic (batching, quoting, routing)

Inventory errors, missed deliveries, or manual tracking cause delays

We have issues catching small but costly mistakes early

Action Prompt: Describe one task where humans act as the “glue” between systems:

SECTION 3: Use Case Readiness

Are you set up to apply AI in a targeted way?

Score each item from 1 (low) to 5 (high).

STATEMENT

SCORE (1-5)

We've identified a specific workflow bottleneck to improve

We can explain the business case for fixing it
(cost, time, quality)

We know what a successful result would look like

SCORING & NEXT STEPS

Total Score: _____ / 45

36-45

You're ready to pilot AI -
choose a use case
and start now

24-35

Good potential, but
clarify goals and
build your dataset

<24

Focus on cleaning up
infrastructure and
processes first

NOT SURE WHERE AI COULD HELP YOU MOST?

Book a short call with our team at gelatoconnect.com/strategy - we'll help you
explore one or two high-impact starting points.
