

Print Software Red Flag Checklist

Common Red Flags

Use this checklist to assess if your current or prospective software tools are holding you back.

Integration & Data Flow

- ☐ Requires manual re-entry of data between systems
- ☐ Limited or no API access
- ☐ No support for real-time updates

Scalability & Resilience

- ☐ Key logic or functionality lives in one person's head
- ☐ Codebase is outdated or hard to maintain
- ☐ System slows down or breaks under increased volume

Flexibility & Customization

- ☐ High fees for customizations or changes
- ☐ Cannot support hybrid/digital workflows
- ☐ Locked into vendor roadmap with no control

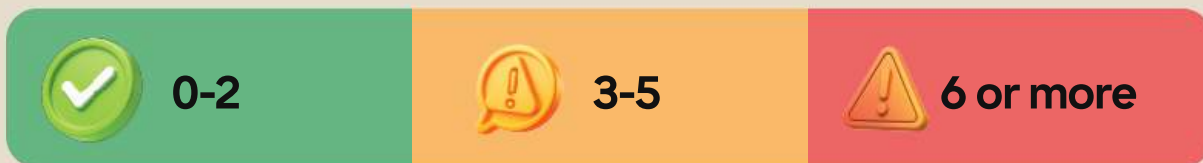

Usability & Support

- ☐ Users require frequent workarounds to complete tasks
- ☐ Support is slow, unavailable, or ticket-based only
- ☐ Training materials or onboarding is limited or outdated

EVALUATION SUMMARY

Count your checkmarks:

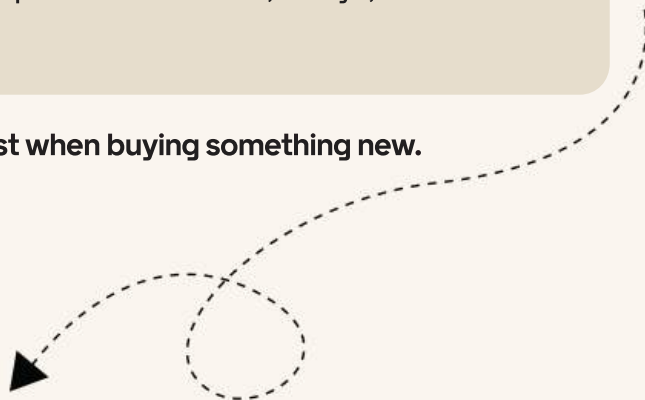

You're in a solid place -
but keep reviewing
proactively

Worth reviewing your
stack and support plans

You're likely facing hidden
costs, delays, or risk

Pro Tip: Use this before you renew, not just when buying something new.
